

CARTRIDGE AND BAG FILTER VESSELS

Model BF-2-6-2-304SS Duplex Bag Filter Unit is manufactured to meet oil field filtration requirements.

The two vessel skid mounted unit is made of 304 Stainless Steel and is manifolded to allow for series or parallel flow.

Vessels are mounted on a heavy duty oilfield skid with crash bars, forklift pockets, and lift- ing eyes.

SPECIFICATIONS

- Maximum operating pressure: 150 PSI @ 250° F
- Flow rate: Up to 16 bbls/min/vessel depending on micron rating of filter bags
- Filter elements: 6 # 2 bags/vessel
- Support basket: 1/8" perforated plate stainless steel basket
- Coverlift: mechanical headlift
- Closure belts: Swing bolt c/w eyenut (carbon steel yellow zinc plated)
- Inlet/Outlet: 4" - 150 lb. RFSO Flange
- Vent: 1/2" 3000 lb NPT coupling
- Dirty Drain: 1" 3000 lb NPT coupling
- Clean Drain: 1" 3000 lb NPT coupling
- Gauge: 2 - 1/2" 3000 lb NPT coupling
- Dimensions: 96" L x 60" W x 64" H
- Weight: 4100 lbs
