

FLIP-FLOP SKIMMER

CONVERTIBLE SKIMMER & FLOATING SUCTION

The Flip-Flop is a simple floatation device that is used to skim oil or other surface materials and pollutants.

The Flip-Flop has a strainer that is adjustable to a precise level for a desired intake to the thinnest film. The Flip-Flop System is equipped with stabilizers for choppy waters.

The Flip-Flop has the change ability to become a floating suction by removing the strainer and inverting the suction pipe.

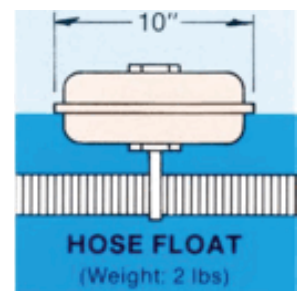

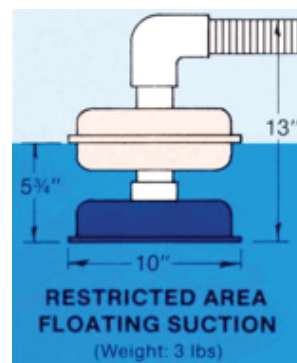

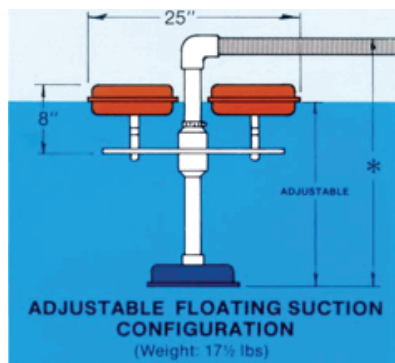

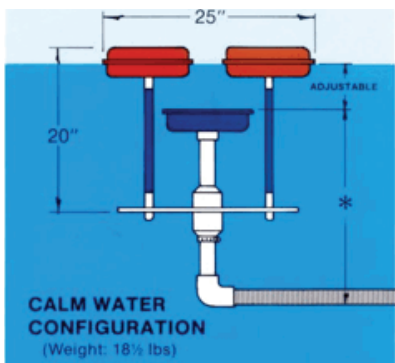

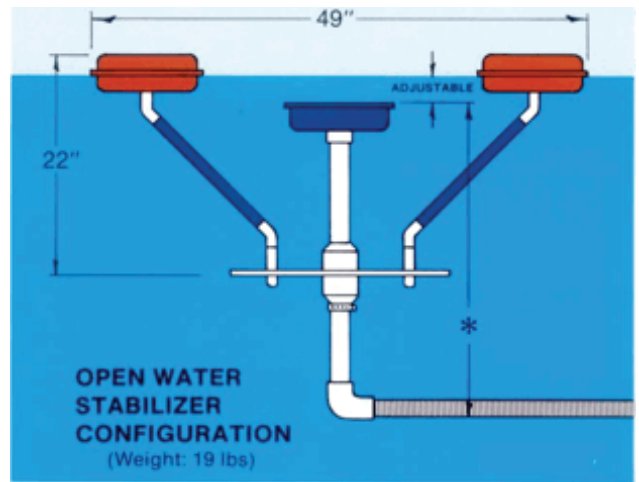

The Flip-Flop System includes a 10 inch floating strainer for confined areas such as man holes oil traps and drains.

The Flip-Flop System is constructed of PVC and is totally oil resistant. (Other materials are available.)

- No moving parts
- Perfectly balanced
- Light weight
- Easy to transport
- Shallow draft
- Inexpensive

AREAS OF APPLICATIONS:

- Oil & liquid recovery
- Oil spills
- Refinery water basins
- Waste pits
- Discharge lagoons
- Barge & tanker ballast
- Fat & grease recovery
- Coolant cleaning

Capacities up to 132 GPM * The suction pipe may be any desired length.
